

The Plas-Tech Fall Addition News Update

PLAS-TECH

Volume 3 Issue 5
September 2009

Exciting News For Industry

Plas-Tech has completed the final phase of installing the processing line for the application of coatings to polycarbonate and acrylic substrate. The new line will substantially increase our production capacity while allowing for single or multi sheet or component applications. By applying the STC5020 or STC587 some major attributes to the substrate material are substantially increased abrasion resistance, uv stabilization, thermal and chemical resistance. The list goes on.

Plas-Tech offers complete Polycarbonate Multi/Wall Sheet & Systems!

Plas-Tech has over the last several months been working with designers, architects and contractors developing requirements for Multi Wall Polycarbonate Systems . Plas-Tech stocks a full range of Multi Wall P/C and Acrylic Multi Wall sheet. Our standard sheet sizes are 4' x 24' & 6' x 24' Thickness ranging from 6mm—25mm. A broad range of P/C application types and profile systems are also stocked. Plas-Tech offers not only sheet, but a full range of extrusions needed to make your installation complete.

Our Vision Statement— *We build relationships that create success. A trusted source in the plastics industry of strategic insight, giving our customers the power to make decisions with confidence.....*

Hard coating clean room

Plas-Tech welcomes two new employees to our staff.

Ali Adibnia. Ali will be responsible for the programming and operation of our 5 axis CNC equipment. Ali brings with him a degree in Mechanical Engineering and is proficient in Mastercam X/X2 and some Solid Works

Welcome also to **Mikhail Khokhlov.** Mikhail will be working with our cut to size and fabrication team. Mikhail is from Novosibirsk, Russia and has been in Canada for the last 4 years. He brings with him warehousing experience and an energetic personality.

In House Tooling

With the addition of our DMS 5 axis Plas-Tech offers complete in house tool design and production. From MDF, to composite to aluminum, both mold and trim fixtures. So whether your requirements are for tooling only or complete production, let the qualified Plas-Tech team bring your product or component

Plas-Tech Goes Green

Our Green Commitment

We will aggressively and proactively pursue material solutions and production practices that minimize the effect on our environment. We will encourage every individual in our company to not only embrace our green policies but to also participate in the implementation of new programs.
