Plas-Tech Incorporated is a custom plastic fabrication company located in Toronto, Ontario. Plas-Tech began operations in 1987, and has steadily grown in both size and capabilities over the last 20 years. Our specialty is custom plastic components supply. From a one-off prototype to a high volume production run, Plas-Tech delivers consistent quality, superior product, and on-time delivery, all at a price that fits your budget.

Plas-Tech's team of professional designers work with state-of-the-art software programs to create high quality parts that meet your specific needs and tight tolerances. We will suggest the best plastic material for your application. Plas-Tech works with a complete line of plastic materials that offer a wide array of settings ranging from chemical resistance, to clarity, to tensile strength, and ease to coat. If you already have a part design, we'll work with your drawings or electronic files and go right to the manufacturing process. Rest assured that your specific needs will be met by our most capable technicians.

Plas-Tech encourages you to THINK PLASTICS and to USE PLAS-TECH.
